REMARKS ACCOMPANYING FILING OF
CIP APPLICATION

Assistant Commissioner for Patents
Washington, D.C. 20231

In response to the objections and suggestions contained in the Office Action dated November 6, 2001 for Application Number 09/384,351, Applicants submit herewith a Continuation-in-part application in which the previously requested amendments to the specification have been made. Additionally, in response to objections raised by the Examiner in that Office Action, Applicants wish to direct the attention of the Examiner to ASTM D1765-99b. Applicants believe that the data contained in this standard for N660 type carbon blacks demonstrates that N660 carbon black does not satisfy the claims of the present invention. Specifically, as found in D1765-99b, N660 carbon black has a DBP No. target value of 90, which is outside of Applicants claimed range.

Applicants have amended independent claims 1, 9 and 16, in response to a reference not previously before the Examiner, and which is submitted herewith in an information disclosure statement, such that the upper limit DBP value of the claimed carbon black is 45.
